

Keep Recovery Moving Forward

discover! SUMMER

An Exceptional Summer Therapy Program
for Kids + Teens with Brain Injuries

At Special Tree, we know the importance of making summer count for kids and teens with brain injury. That's why our pediatric summer therapy program is specially designed to support rehabilitation and recovery all summer long. Based from Special Tree's Romulus and Troy locations, students in the program participate in therapy-based activities that optimize cognitive, physical, behavioral, academic, and vocational skills.

Friday	AM	Community Integration	Community Integration
	PM	Community Integration	Community Integration

DAILY OUTCOME MEASURES

Programming is focused on helping students reach their rehabilitation goals throughout the summer. To ensure each student is making progress, staff conduct daily functional outcome measures in key developmental areas.

VOCATIONAL TRAINING

Students ages 14 and older participate in part-time paid work opportunities during the 10-week program. Daily feedback from staff helps students learn the attitudes, skills, and behaviors needed to get and keep a job.

SOCIAL SKILLS DEVELOPMENT

Helping students build relationships with others is a key component of the **Discover! Summer** program. Kids learn social skills to help them interact, and strategies for dealing with their moods and feelings.

BACK TO SCHOOL SUCCESS

Learning and academics are woven throughout the program so students are ready for a successful transition back to school in the fall. Other academic supports include transitional educational services, academic testing, and tutoring.
